Quilting for Inside a Muff

By: BurdaStyle

http://www.burdastyle.com/techniques/quilting-for-inside-a-muff

For extra warmth and comfort inside our muff, you can quilt the lining fabric before cutting out the fabric piece. Here, we show you how to do parallel lines, but you can also experiment with diamond shapesâthatâs a nice effect too!

Step 1

If your pattern piece is on the fold, cut the fabric more than 4 times its length, and slightly bigger than its height. Draw straight lines at 1 1/2" intervals.

Step 2

Sew basting stitches along lines.

Step 3

Pull the bobbin threads, gathering the fabric.

Step 4

We are using silk charmeuse in the example, but if you are using a heavier fabric, you may not be able to gather it quite so much. Check that the size of the gathered fabric is sufficient for cutting out the muff pattern pieces.

Step 5

Now, cut out and continue your project.
